
*There's a reason things are able
to triumph in tough places.*

Prevail at your peak.

Achievement is built with resilience and endurance.
With motivation and emotion. Achievement begins with
inspiration and ends with everlasting pride. Achievement is finally
reaching the destination you've come so far to experience.
And making it your own.

Vibrant. Powerful. Rugged.
Like the places you'll find it.

CraneBoard® 6

With a triple-width insulated span, a straight face and deep shadows, the 6" profile complements accents of stone, shake and board and batten like red complements a rose.

CraneBoard® 7

The 7" clapboard plank's architecturally correct width, deeply shadowed shape and hand-milled cedar finish make it an ideal choice for a variety of home styles.

CraneBoard® Board & Batten

Board & Batten adds charm and dimension to conventional façades and provides exceptional weather resistance. See how alluring tough can be.

CraneBoard® 4" Clapboard

Radiant beauty, timeless elegance and brilliant engineering come together like constellations in a clear sky with the 4" clapboard. See its appeal for yourself.

CraneBoard® 4.5" Dutchlap

You'd assume the 4.5" Dutchlap profile was a product of nature until you saw how it performed against it. That's the appeal of its strong cedar grain finish.

SMART STYLES™ EXPRESSIONS

SMART STYLES™

¹ Not available in 4" Clapboard or 4.5" Dutchlap

Built to conquer. And please.

WHAT MAKES CRANEBOARD® SOLID CORE SIDING® SO BEAUTIFUL?

It looks exactly like real cedar but doesn't act like it

Its wide panels (6" and 7") ensure architecturally correct looks

Its horizontal lap and board and batten profiles provide you with even more exterior design options

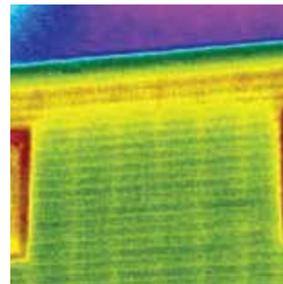

It straightens walls for a clean, smooth finished look

It's available in 12' and 16' lengths, reducing the appearance of seams

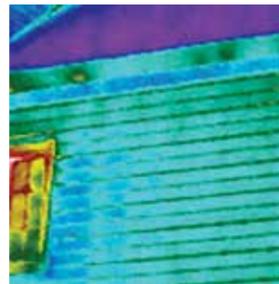

It comes in a wide range of colors that are all ASA capped for amazing UV resistance

CraneBoard prevents thermal bridging.

Heat and energy escape through the studs of your home's walls; this is known as thermal bridging. Only insulated vinyl siding reduces thermal bridging.

Studs make up 25% of your home's walls. The yellow lines show how heat transfers through the studs.

CraneBoard Solid CoRe Siding reduces the amount of heat and energy you lose through studs. And that's as beautiful as the siding itself.

Find inspiration through innovation.

CraneBoard® Solid CoRe Siding® isn't just setting gorgeous design trends—it's setting bold technological ones, too. It's constructed with Neopor®* insulation, which reflects radiant heat. It also features the Smart Track™ system** with moisture management ridges, which prevent water from being trapped. Plus, it looks gorgeous years after it's installed and requires little maintenance, unlike fiber cement and engineered wood claddings.

PERFORMANCE FEATURES

No painting. No scraping. Virtually no maintenance

Reduces noise by up to 45%

The only insulated siding that has graphite-enhanced EPS insulation made with Neopor, which provides up to 19% higher R-value than traditional insulation, depending on the profile

Highly resistant to impact

Built with TXL™ Lamination Technology for superior bonding

Wind resistant up to 160 mph, depending on the profile

Insulates better than wood, brick and fiber cement - saving money

Easy, quick, safe installation

Life of the Home Limited Warranty
